

### **Ninigret Pond No-Wake Zones and Reckless Vessel Operation**

As the season comes into full swing, it is important boaters ensure they are operating their vessels in a safe, and respectful manor. To re-enforce the importance of safe boat operation, I have attached to this notice a PDF document describing the established no-wake Zones on Ninigret Pond, as well as providing general no-wake and reckless vessel operation information that applies to both Ninigret and Quonnie Ponds.

The no-wake zone has been expanded to include Shelter Cove at Charlestown Beach Rd. including the Pond Shore Association, waters adjacent to Tockwotten Cove and up to the Arches Association Dock thru to Marsh Point.

Enforcement will be in effect from May 15th to September 15<sup>th</sup>

Also, boaters no longer have the option to by-pass the no-wake zone south of the no-wake buoys at speed, as was previously allowed.

While these regulations may inconvenience many, the safety of all vessel operators and paddle sport users takes priority and boater compliance is much appreciated.
